

# Folder structure

Version 0.2

22 August 2024

# Change Control:

Version No.	Date Issued	Amendment Summary
0.1	09/08/2024	First Issue
0.2	22/08/2024	Removed word 'Proposal' from Front Cover Removed word 'Proposed' from title on page 4.

# Current DPS Solution

- The folder structure is based on the customer's Market Group Reference supplied during the Velonetic onboarding process
- The Market Group Reference contains both an IEAccount and UserID elements
  - Inbound files:
    - /<IEAccount>/<UserId>/Inbound/<FolderType>
  - Eg:
    - /0775/GUY/Inbound/LIMCLM
  - Outbound files:
    - /<IEAccount>/<UserId>/Outbound/<FolderType>
  - Eg:
    - /AJG/GBLL/Outbound/BSM

# Solution

Simplify the structure of the EDI folders into the below

**NB:**

Market Group Reference represents a collection of markets for a Party

The **Market Group Reference** is a concatenation of IEAccount and User Id elements.

- / <IEAccount>.<UserId>/Inbound
- **Eg:**
  - /0775.GUY/Inbound
  
- / <IEAccount>.<UserId>/Outbound
- **Eg:**
  - /AJG.GBLL/Outbound

# SFTP setup

## Current DPS solution

- The SFTP credentials are setup at party level
- SFTP Credentials - 1 credential per organization (current status)
- 3rd party access – discretion with the client
